

MYKE WILLIAM

Full Stack Developer | React.js • Node.js • Express • PostgreSQL

São Paulo, Brazil | mykewilliam.dev@gmail.com | +55 11 97818-7108 | github.com/CodeWizardMyke | Portfolio: add link

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building web applications using JavaScript, React.js, Node.js, Express, and SQL databases. Experienced in responsive interfaces, REST APIs, JWT authentication, CRUD operations, PostgreSQL/MySQL integration, file uploads, and application deployment. Commercial project experience combined with the development of complete systems using separate frontend and backend architectures.

PROFESSIONAL EXPERIENCE

Web Developer - ALS Bordados | March 2025 - Present

- Develop and maintain the company's institutional website using React.js and JavaScript.
- Redesigned the interface with a focus on responsiveness, user experience, and cross-device compatibility.
- Built service, embroidery gallery, company information, and contact pages using reusable components.
- Implemented a dynamic gallery with categories, filters, and modal views, while optimizing images, applying on-page SEO practices, and deploying the application on Vercel.

MAIN PROJECT

Manager - E-commerce Management System | Full Stack Developer

- Developed a full stack application with React.js/Vite on the frontend and a REST API built with Node.js and Express on the backend.
- Implemented authentication and authorization with JWT and bcrypt, using PostgreSQL and Sequelize ORM for data persistence.
- Built CRUD features for products, categories, brands, and users, including image upload and management with Multer and data validation with express-validator.
- Created a dashboard and role-based permission system, integrated frontend and backend with Axios, and deployed the application using Vercel and Render.

EDUCATION

B.Sc. in Computer Science - Cruzeiro do Sul University | In progress - 5th semester

TECHNICAL SKILLS

Frontend: JavaScript, React.js, React Native, HTML5, CSS3, Bootstrap, Vite

Backend: Node.js, Express.js, REST APIs, JWT, bcrypt, Multer, express-validator

Databases: PostgreSQL, MySQL, Sequelize ORM, SQL

Tools & DevOps: Git, GitHub, Docker, Postman, Vercel, Render, Figma, MySQL Workbench

Concepts: CRUD, MVC, authentication, authorization, responsive design, frontend/backend integration, and Git version control
